## INTRODUCE

---

Hayo, my name is Nguyen Truong Anh Kiet, a developer with two years of experience under my belt. I specialize in Frontend development and have worked extensively with React, Angular as well as TypeScript and .NET.

I started my career as a Junior Frontend Developer at a startup in Vietnam, where I honed my skills in web development and gained valuable experience working in a team. After a year, I moved on to work as a Frontend Developer at a software development company, where I continued to develop my skills and work on exciting projects.

In my spare time, I enjoy experimenting with new technologies and exploring different programming languages. My passion for learning has led me to develop a deep understanding of many programming languages and technologies, and I am always eager to learn more.

In terms of future plans, I have a keen interest in exploring new technologies and expanding my skill set. I am particularly interested in learning more about machine learning and AI, and I plan to take courses in these areas in the near future.

## EDUCATION

---

### Hue Industrial Collage

Expert Applied Informatics

Member of HueIC Media Group

Overall GPA: 3.68 / 4

*August 2017*

### Phu Xuan University

B.S. in Information Technology

Overall GPA: 3.8 / 4

*August 2020*

## WORK / EXPERIENCE

---

### Freelancer / Remote

*Fullstack Developer*

December 2021 - Present

*Vietnam*

- Design the power delivery and fulfill customer's requirement.
- Prioritize using the latest technologies to help optimize compatibility for customers.

### TechX

*Creator / Developer*

August 2023 - Present

*Vietnam*

- This is my university graduation project, but i will develop it in parallel with my career.
- This is a website where people can share each other's knowledge by making appointments and teaching each other, in addition to posting jobs, posting and discussing.
- After being taught by an experienced person, that skill is automatically added to your profile so users can get more skills from experienced people and from serious user learning.
- This is also a project where I use a lot of new technology in this, both to learn and develop skills, and to help me enjoy working.
- In addition, after you enter a job or take any action AI will tell you what skills are needed to do it.
- Technical: Microservices, Microfrontends, Docker for Development and Deployment.
